

MELCHOR BANAL JR

Document Controller / Administrative Support

melchorbanaljr@gmail.com · +63 967 047 8692 · Bataan, Philippines · Open to relocation

Professional Summary

Document Controller / Administrative Support professional with 7+ years of experience in aluminum, glass, and façade (cladding) projects. Skilled in RFIs, technical submittals, transmittals, document registers, payroll reporting, data entry, and office coordination. Reliable in supporting project teams and maintaining accurate administrative workflows.

Experience

Aluminum Developers – Head Office

Qassim, Saudi Arabia

CAD Drafter / Document Controller

Feb 2016 – Sep 2019

- Managed project documentation using a structured shared folder system with controlled access, revision tracking, and transmittal logs across 60+ to 80+ villa contracts annually and 10+ building projects.
- Controlled document numbering, filing, distribution, retrieval, and revision control of engineering drawings and technical documents.
- Prepared and tracked document transmittals between engineers, project teams, and management.
- Organized as-built drawings and final project documentation for client handover; maintained a digital archive for easy retrieval.
- Coordinated with engineers, supervisors, and stakeholders to ensure proper document updates and distribution.
- Supported procurement documentation and project reporting; prepared and updated shop drawings using AutoCAD.

Skyfreight

Riyadh, Saudi Arabia

Data Entry Clerk

Sep 2019 – Jul 2020

- Entered shipment details into the company system; prepared and labeled cargo boxes.
- Maintained shipment records using Excel; assisted customers during drop-off and verified documentation.
- Ensured accurate record-keeping and timely data updates for operational workflow.

Aluminum Developers – Factory Operation

Riyadh, Saudi Arabia

CAD Drafter / Document Controller

Jul 2020 – Jul 2023

- Managed document control system for factory operations: technical records, procurement files, production docs, and project reports.
- Processed RFIs, maintained logs, and coordinated with engineers for timely resolutions.
- Prepared and tracked technical submittals (shop drawings, data sheets, samples); managed document registers and drawing logs for multiple projects.
- Handled incoming/outgoing transmittals for technical and commercial documents; developed a window numbering system for better tracking.
- Conducted on-site measurements for estimation; coordinated daily glass orders with manufacturers and monitored deliveries for multiple client projects.
- Maintained attendance and overtime records and prepared monthly workforce reports for payroll submission to head office.
